Cartier manufactures wood cabinets for use by a variety of customers. Raw materials, which consist of wood planks and particleboard, are transported to the facility by truck where they undergo a number of processes including machining, planing, sanding, staining, sealing, gluing and final assembly prior to shipping from the facility as completed cabinets.

The Toxic substance toluene is used in the facilities painting area which consists of 12 manual spray booths and two (2) flat line water based roller lines. This substance is contained within coatings purchased by the facility, used as reducers and/or catalysts and used as cleaning solvents.

In 2012, toluene was released on-site to air and transferred off-site for recycling by third parties
